PROFESSIONAL SUMMARY

Full-Stack .NET Developer with **5+** years of experience building, modernizing, and supporting **enterprise applications** across **banking, healthcare, and analytics domains**. Strong background in **.NET/.NET Core, C#, and RESTful APIs**. Strong expertise in **Angular and React** for building responsive, **user-centric UIs**, along with **Entity Framework, LINQ, and SQL Server** for data-driven backend services, with growing hands-on exposure to **Generative AI, LLM-based development, and Azure AI services**, applying AI-assisted, prompt-driven approaches to accelerate the SDLC. Experienced in **microservices architecture, API integrations, cloud platforms (Azure and AWS), and CI/CD pipelines**. Proven ability to write clean, maintainable code, troubleshoot complex issues across frontend, backend, and databases, and collaborate effectively in **Agile teams** to deliver secure, scalable **enterprise solutions**.

TECHNICAL SKILLS

Programming Languages: C#, .NET Framework (4.x), .NET Core (3.1/5/6/7/8), SQL, JavaScript (ES6+), TypeScript, Python (AI/automation scripting), VB.NET, Java

Web Development & Frameworks: ASP.NET Core MVC, ASP.NET Core Web API, RESTful Services, Entity Framework 6 / EF Core, LINQ, Spring Boot, Blazor, Razor Pages, jQuery, AngularJS (Legacy), Angular (10–16), React.js, WCF & SOAP Web Services, SOAP UI, RESTful API Development

Front-End Technologies: HTML5, CSS3, Bootstrap 4/5, Angular Material, Kendo UI, JSON, XML, RxJS, Breeze.js

Databases & Tools: Microsoft SQL Server (2012 – 2022), Oracle (basic queries and schema design), T-SQL, Stored Procedures, Query Optimization, Indexing, Triggers, SQL Profiler, SSIS, SSRS, MySQL, Analytics Automation, SQL DBX, MongoDB

Development Tools & IDEs: Visual Studio 2022/2019, Visual Studio Code, Microsoft IIS, SQL Server Management Studio (SSMS), Postman, Swagger, PowerShell

Version Control & CI/CD: Git, GitHub, Azure DevOps (Repos, Pipelines, Boards), Jenkins, CI/CD Pipelines, Bitbucket, XL Deploy, SonarQube, Checkmarx, CyberArk, Terraform, Docker, Kubernetes

Testing Frameworks: xUnit, NUnit, Moq, Jasmine, Karma, Selenium, Playwright (TypeScript, exposure), Postman, JMeter & K6 (performance testing, working knowledge), Test-Driven Development (TDD), Behavior-Driven Development (BDD)

Cloud Platforms & Services: Microsoft Azure (App Services, Azure SQL Database, Blob/Table/File Storage, Service Bus, Functions, Key Vault, AKS), AWS (EC2, S3, RDS), Cloud Architecture Fundamentals

AI, LLM & Intelligent Development: AI-assisted development tools (GitHub Copilot, ChatGPT), Generative AI & Agentic AI workflow design, Large Language Model (LLM) fundamentals, Azure OpenAI & Azure AI Services (working knowledge), Prompt engineering for development, debugging, and test generation, Retrieval-Augmented Generation (RAG) & Vector Database concepts (Azure Cognitive Search, exposure), API-based AI integration concepts, AI coding assistants (Cursor AI, Claude API, Google Gemini), Responsible AI usage, data privacy, and security awareness, AI-enabled SDLC workflows

Architecture & Patterns: Microservices, Event-Driven Architecture, Monolithic Applications, MVC, MVVM, Dependency Injection (DI), Object-Oriented Programming (OOP), SOLID Principles, Repository & Factory Patterns

Methodologies & Project Management: Agile, Scrum, Kanban, Sprint Planning, JIRA, Azure Boards, Confluence, Code Reviews, Pair Programming

Other Technologies: Node.js, Kafka, RabbitMQ, SSIS, SSRS, Dapper ORM, JSON Web Tokens (JWT), OAuth2, Identity Server, Azure AD

EXPERIENCE

JP Morgan Chase

Full Stack .NET Developer

Jan 2025 – Present

New York, USA

- Designed and developed enterprise applications using **ASP.NET Core 7/8, C#, Web API, and Entity Framework Core**, ensuring modular and scalable backend architecture.
- Developed responsive enterprise web interfaces using **Angular 16, TypeScript, Kendo UI, RxJS, HTML5, CSS3, and Bootstrap**, building reusable components and integrating them with REST APIs.
- Implemented **secure authentication and authorization** with **JWT, OAuth2, Identity Server, and Azure AD**, enforcing role-based access control across APIs.
- Optimized **SQL Server 2019/2022** databases with stored procedures, triggers, indexing, and query tuning, reducing query response times by **30–40%**.
- Developed **Python automation** scripts for data processing, validation, and reconciliation, integrating with **SQL Server** and **REST APIs** to support financial application workflows.
- Modernized legacy service components by refactoring them into scalable **ASP.NET Core 7/8 microservices**, improving **maintainability** and **deployment consistency**.
- Used **AI-assisted development** tools (GitHub Copilot, ChatGPT) to accelerate **code refactoring**, unit test creation, and troubleshooting while adhering to **enterprise coding standards**.

- Explored **Generative AI and Agentic AI workflows**, evaluating **Azure OpenAI Service** and **Retrieval-Augmented Generation (RAG)** concepts for internal developer tooling, contributing to team discussions on AI-enabled SDLC practices.
- Built and consumed **RESTful APIs** and **microservices** with **secure communication**, improving scalability and **system performance**.
- Troubleshoot and resolved issues across **frontend**, **backend services**, and **SQL databases** in production environments.
- Developed and supported data integration, reporting, and automation solutions using **SQL Server**, **Informatica**, **Alteryx Analytics Automation**, **SQL DBX**, and **Power Automate** to support business and operational requirements.
- Integrated **Azure Service Bus** and **Kafka** for real-time messaging, enabling reliable middleware communication in a microservices architecture.
- Supported CI/CD and release workflows using **Jenkins**, **Bitbucket**, **XL Deploy**, **SonarQube**, **Checkmarx**, and **CyberArk**, performing code-quality and security checks across application environments.
- Configured and deployed applications on **Microsoft Azure (App Services, Functions, Storage, Key Vault)** and **IIS**, ensuring secure and scalable multi-environment hosting.
- Experimented with **Azure Cognitive Search** and **vector embeddings** to prototype a **Retrieval-Augmented Generation (RAG)**-based internal documentation search, building hands-on familiarity with vector database concepts alongside existing Azure deployments.
- Used **Python** to prototype **AI-enabled** workflows integrating **Azure OpenAI**, **Azure Cognitive Search**, **vector embeddings**, and **RAG** concepts for internal documentation search and developer productivity use cases.
- Collaborated directly with **business analysts** and **architects** in an on-site **Agile environment** to design and deliver financial transaction modules aligned with regulatory and security requirements.
- Created reports using **SQL Server Reporting Services (SSRS)** for analytics dashboards and audit tracking.
- Conducted unit and API testing using **Jasmine**, **Karma**, **NUnit**, **Selenium**, and **Postman**, maintaining **85%+ coverage** and reducing post-release defects.
- Piloted **AI-assisted test generation** using **prompt engineering** techniques to draft **Playwright** scripts in TypeScript, supplementing existing Selenium-based API and UI test coverage.
- Collaborated with **developers**, **business analysts**, and **architects** during design and code reviews, providing technical guidance and supporting team members during feature **implementation**.
- Implemented distributed caching using **Redis** and **Azure Cache for Redis** to enhance application performance and reduce dependency on **database** round-trips.

United Healthcare

Sep 2021 – Aug 2023

.NET Developer

Hyderabad, India

- Built enterprise-grade modules using **ASP.NET Core 6/7**, **Web API**, **Blazor Server**, and **EF Core**, enabling interactive web apps without heavy **JavaScript frameworks**.
- Developed and deployed **WCF** and **ASP.NET MVC 4** applications using **.NET Framework 4.5**, implementing business logic in **C#** and integrating with **SQL Server 2012** through **ADO.NET** and **Entity Framework 6**.
- Developed **RESTful APIs**, **WCF/SOAP web services**, and **microservices** supporting both **legacy and modern systems**.
- Collaborated with **UI/UX**, **QA**, and **product owners** to deliver end-to-end features across **frontend** and **backend layers**.
- Designed **database schemas** and **optimized SQL queries** to **improve performance** and **data integrity**.
- Enhanced scalability with **Redis distributed caching** and **SQL Server 2019** query optimization, improving transaction throughput by 40%.
- Developed dynamic UIs with **Razor Pages**, **Bootstrap 5**, and **custom reusable components**, ensuring a consistent user experience across devices.
- Secured applications with **Azure AD B2C**, **OAuth2.0**, **JWT tokens**, and **Key Vault**, enforcing strict compliance for authentication and secrets management.
- Deployed microservices to **Azure Kubernetes Service (AKS)** with **Docker containers** and automated scaling, ensuring resilience under peak loads.
- Automated builds and deployments using **GitHub Actions** and **Azure DevOps pipelines**, cutting release cycle times by 35%.
- Integrated **Azure Event Hub** and **Service Bus** for streaming and asynchronous workflows, enabling reliable real-time data processing.
- Explored **AI-driven** approaches to improve developer productivity, documentation quality, and test coverage within regulated **healthcare environments**.
- Conducted automated testing with **xUnit**, **NUnit**, **Selenium**, **Moq**, **Jasmine**, and **Karma**, achieving **80%+ coverage** and ensuring production stability.
- Designed proactive monitoring and alerting with **Azure Monitor**, **App Insights**, and **Grafana dashboards**, reducing system downtime by 25%.
- Integrated **CI/CD quality gates** with **SonarQube** and static code analysis tools to enforce coding standards and reduce vulnerabilities.
- Implemented **feature toggles** and **blue/green deployments**, minimizing downtime during releases and

- improving deployment safety.
- Utilized **Dapper ORM** alongside EF Core for lightweight high-performance queries where needed.
- Applied **SOLID principles, Dependency Injection, and Clean Architecture patterns** to improve maintainability and scalability.
- Leveraged **PowerShell automation scripts** for environment setup and Azure resource provisioning, improving developer onboarding speed.
- Coordinated with Agile teams using **Jira and Azure Boards**, participating in sprint planning, daily stand-ups, and retrospectives to deliver business-critical features on schedule.

Homeserve
Software Engineer

Jul 2020 – Sep 2021
Hyderabad, India

- Engineered a **cloud-native microservices-based analytics** platform using **ASP.NET Core, Web API, RESTful APIs**, and **C#**, supporting real-time data processing at scale.
- Developed highly interactive **React.js dashboards with Redux and Angular 11/12 modules**, providing dynamic visualizations for large datasets.
- Designed and deployed **serverless workflows** using **Azure Functions and Logic Apps**, automating reporting pipelines and reducing manual effort by 35%.
- Contributed to event-driven and streaming workflows using **Azure Event Grid, Kafka, and Service Bus**, supporting near **real-time analytics** and **decoupled microservices**.
- Built **data pipelines** with **SQL Server 2016/2019, SSIS, and Azure Data Factory**, optimizing ETL processes and reducing processing time by 40%.
- Applied **advanced caching strategies** with **Redis and Cosmos DB**, enabling low-latency analytics queries across distributed systems.
- Developed **Python automation** scripts for data validation and transformation within **analytics workflows**, supporting **SQL Server** and **Azure-based** data pipelines.
- Secured sensitive APIs with **OAuth2, JWT, Azure AD, and Key Vault**, meeting enterprise-grade compliance and regulatory standards.
- Deployed microservices on **Azure Kubernetes Service (AKS)** with **Docker containers**, integrating auto-scaling and load balancing for peak workloads.
- Automated CI/CD pipelines using **Azure DevOps and GitHub Actions** with quality gates via **SonarQube**, cutting deployment cycle time by 45%.
- Conducted comprehensive testing with **xUnit, NUnit, Selenium, Cypress, Moq, and Postman**, improving release quality and reducing post-production defects.
- Established **observability and monitoring** with **Azure Monitor, App Insights, and ELK Stack**, enabling proactive issue detection and faster resolution.
- Collaborated in **Agile/Scrum teams** using **Jira and Azure Boards**, contributing to sprint planning, backlog grooming, and cross-team architecture reviews.

PROJECTS

Cloud-Native Real-Time Analytics Platform (Feb 2019 – Aug 2019)

Description: Delivered an interactive analytics dashboard to visualize large-scale data in real-time for enterprise decision-making.

Key Contribution: Designed **serverless data pipelines with Azure Functions and Event Hub** to process streaming data and built dynamic dashboards in **Angular 7/8**. Optimized queries in **SQL Server 2016/2017** and developed interactive reports using SQL Server Reporting Services (SSRS) and Power BI integration.

Technologies Used: ASP.NET Core 2.2/3.0 Preview, C#, Angular 7/8, SQL Server 2016/2017, Azure Functions, Azure Event Hub, SSRS, Power BI. Agile/Scrum, JIRA, GitHub, Bitbucket, Strong verbal and written communication with cross-functional teams.

CERTIFICATIONS

- Oracle Cloud Infrastructure AI Foundations Associate, Jan 2026
- Microsoft Certified: Azure Developer Associate (AZ-204), Jun 2023
- AWS Certified Developer – Associate, May 2022

EDUCATION

University of Central Missouri Master's in Technology
